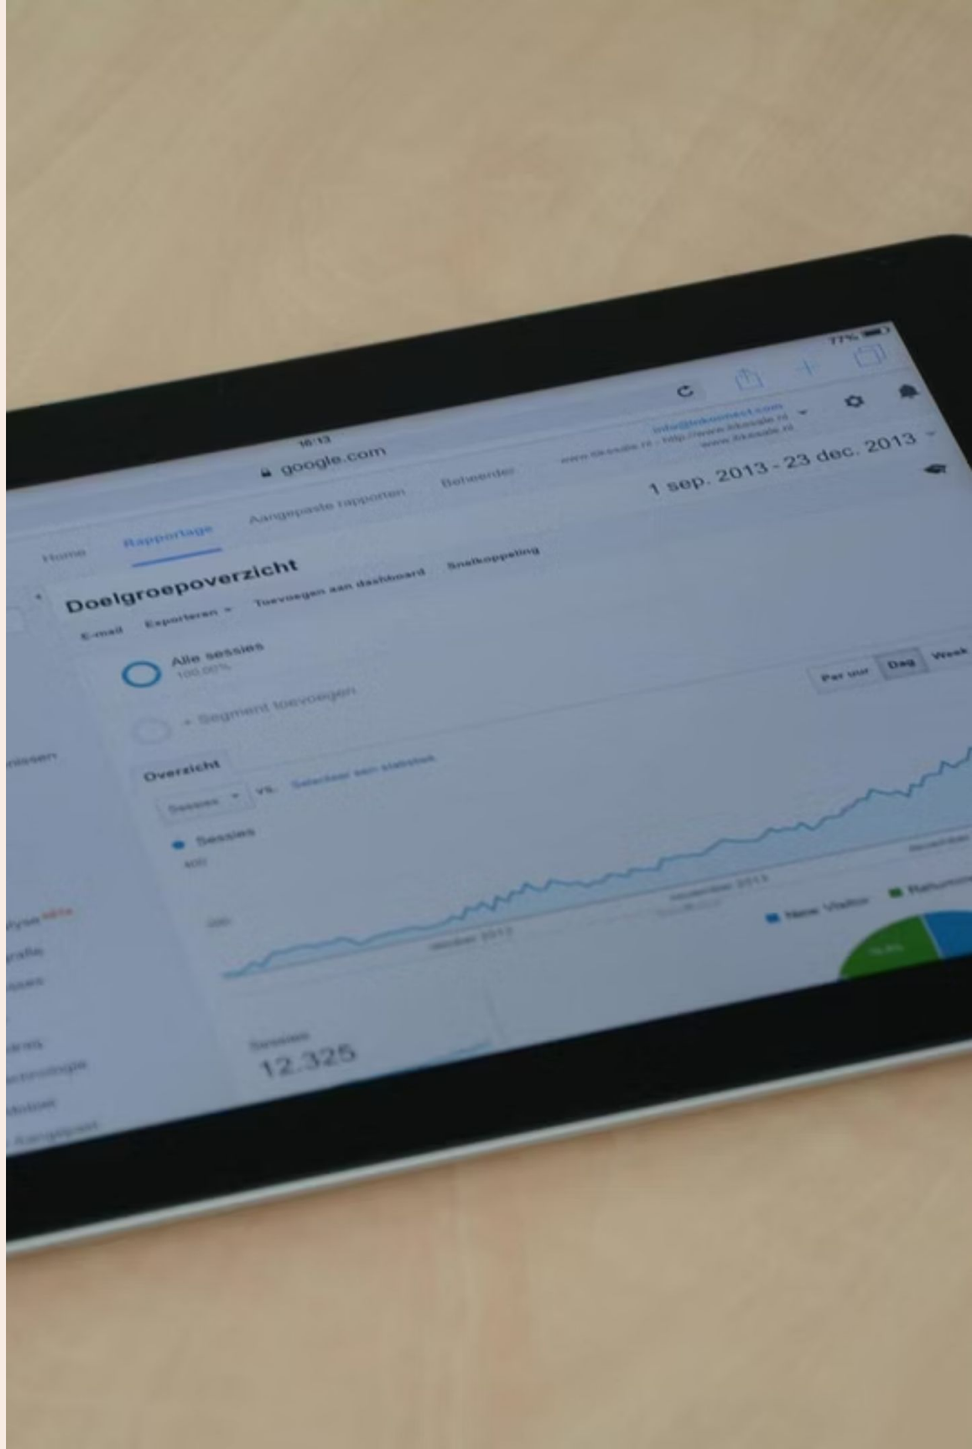
I turn your data into clear decisions

Irene de Hoz Atero

Junior Data Analyst | Business Intelligence Consultant

irene.hoz.atero@gmail.com



MADRID, SPAIN

I work with teams who need clarity, not more data

Whether you're a startup, scale-up, or SME, I help you move from scattered data to confident, data-backed decisions.

Flexible collaboration

Project-based support or ongoing collaboration — embedded in your workflow when needed.

Clear communication

Structured deliverables. Transparent timelines. Fast iteration cycles.

Business-first mindset

No overengineering. No vanity dashboards. Only analysis that drives measurable impact.

What’s slowing your business down?

If any of this sounds familiar, we should talk.

Your data is fragmented

Multiple sources. No single source of truth. No consistent data model.

Lack of clear KPIs

You’re tracking metrics — but not the ones that truly drive growth or profitability.

Decisions rely on intuition

There’s no reliable reporting framework to support strategic choices.

Reporting is manual and time-consuming

Your team spends hours exporting, cleaning, and rebuilding the same reports every week.

MY SERVICES

Data Cleaning & Structuring

I transform raw, inconsistent data into reliable, analysis-ready datasets. Includes validation, normalization, deduplication, and quality checks.

Exploratory Data Analysis (EDA)

I uncover patterns, trends, and anomalies using Python and SQL. Ideal for understanding customer behavior, product performance, or operational inefficiencies.

Reporting & Dashboard Automation

I build streamlined ETL workflows and automated dashboards so your reporting runs itself. Less manual work. Fewer errors. More visibility.

Insight Delivery & Decision Support

I don’t just deliver charts — I provide context, interpretation, and clear next steps so stakeholders can act with confidence.

PERSONAL PROYECT

Case Study: Pharmacy Sales Analytics 2024

The Challenge

Using a public Kaggle dataset (1.2M+ transactions), I built a full Power BI reporting solution to demonstrate end-to-end BI capabilities: Data modeling | DAX-based time intelligence | Business-focused dashboard design | Insight generation and recommendations

The objective: turn high-volume transactional data into actionable commercial insights.

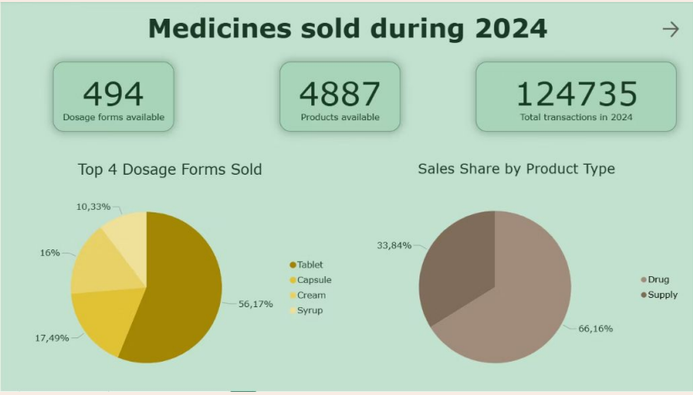
Scope

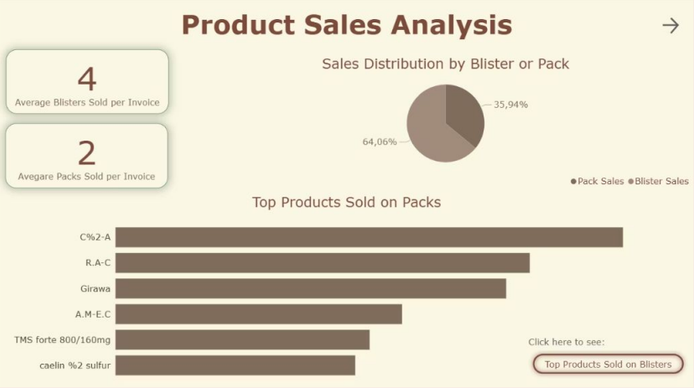
- Analyzed 1,247,435 transactions
- Identified product performance trends by pharmaceutical form
- Conducted basket composition analysis
- Built time-series analysis (monthly, weekly, hourly)
- Delivered 3 interactive executive dashboards

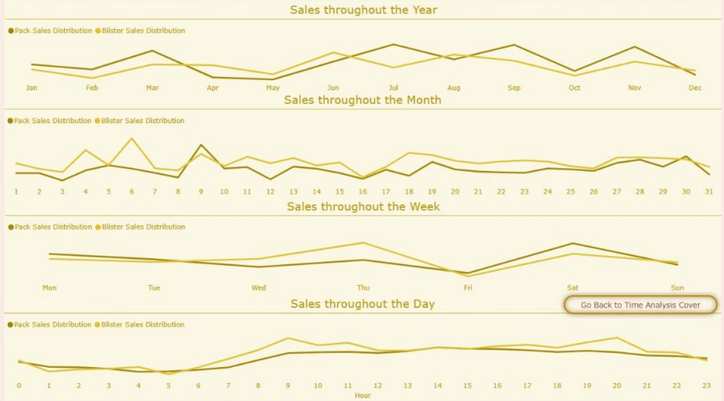
Tech Stack

Power BI (data modeling, DAX, visualization), Kaggle dataset, Custom calendar table for advanced time intelligence, colour palette Piktochart

What the Data Revealed







1.2M

transactions analyzed

8–10 AM
7–8 PM

peak sales windows

50%+

of revenue driven by tablets

Strategic Recommendations: Rebalance inventory toward high-performing formats. Optimize staffing during peak demand. Launch targeted promotions during low-traffic periods. Test expanded package formats to unlock growth

This is what happens when raw data becomes decision intelligence.

From Raw Data to Business Impact in 5 Steps

Scope Alignment
We define the business question.

KPIs
Validate data quality, structure, and availability.

Data Preparation
Clean, structure, and build a reliable data model.

Visualización
Design intuitive, decision-ready dashboards.

Recommendations
Translate insights into clear next actions.

Every engagement is outcome-driven. Deliverables are designed to be used — not archived.

Tech Stack: Tools I Use to Deliver Results

Python

EDA, automation, data wrangling (pandas, numpy, matplotlib, seaborn)

SQL

Joins, subqueries, aggregations, query optimization

Power BI & Tableau

Interactive dashboards, semantic data modeling, executive reporting

ETL Workflow

Data extraction, transformation, and automation pipelines

AWS

(Cloud Practitioner level)

Foundational cloud knowledge for scalable data infrastructure

What Sets Me Apart

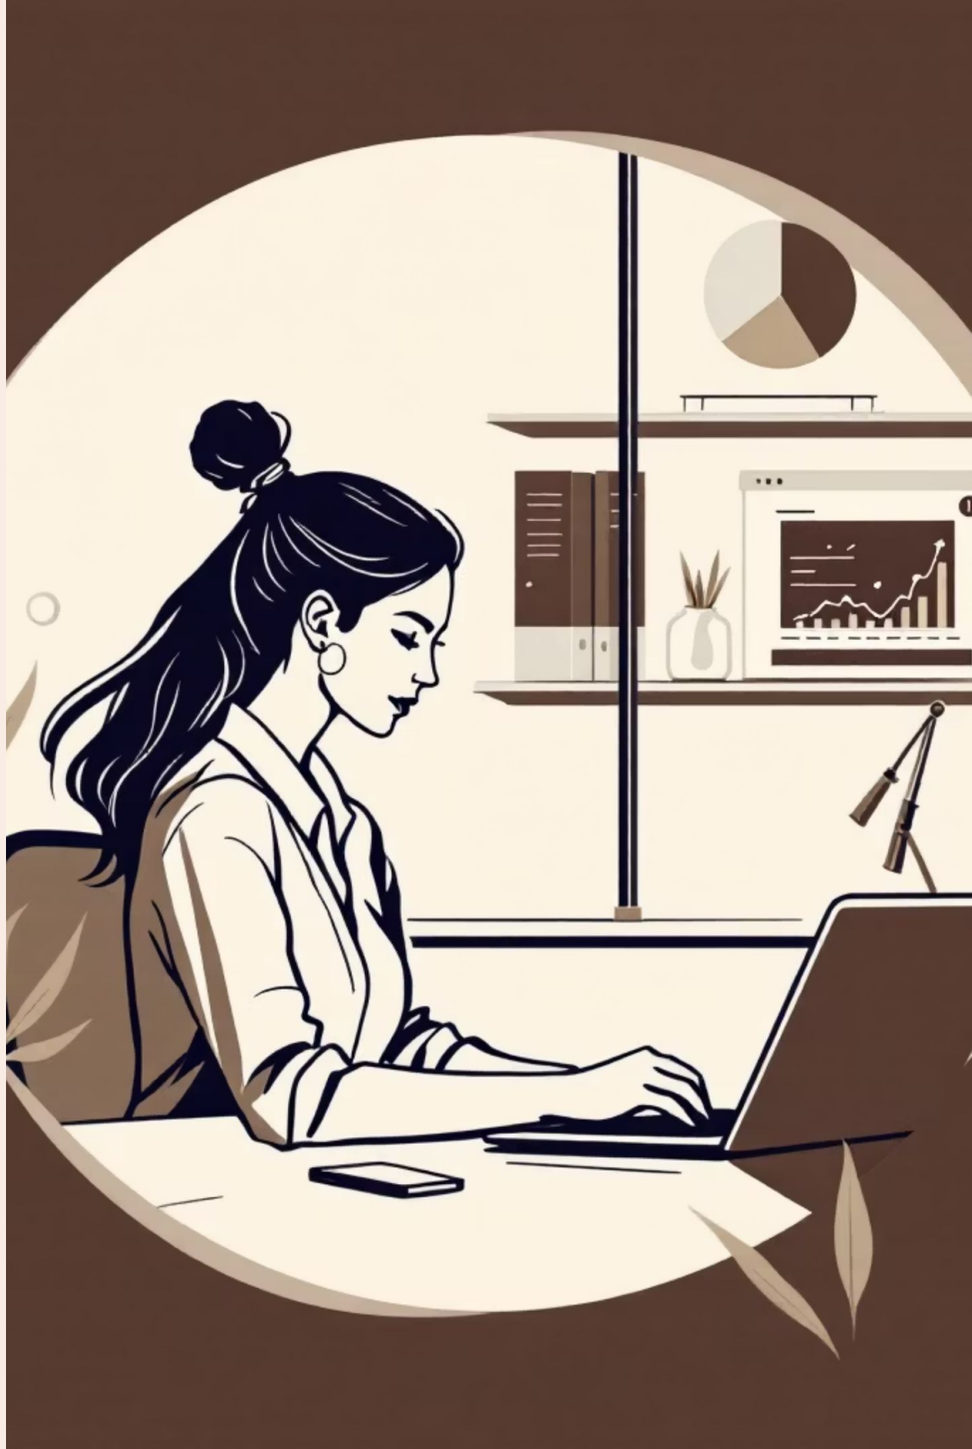
A Hybrid Profile with Business Impact

Strong business communication background

6+ years translating strategy into clear messaging for leadership and cross-functional teams. I know how to make data understandable — and persuasive.

Decision-driven analysis

I don’t start with tools. I start with the decision you need to make. Then I design the analysis to answer that question precisely. You get clarity, not complexity.



Let’s Work Together

Ready to make your data work for you?

If you need structured, reliable data, dashboards your team actually uses, clear insights to support strategic decisions: Let’s connect!

I respond within 24 hours.
